

Bellara

Steel Siding

Natural Beauty,
Locked in.

Siding crafted to emulate natural wood, engineered from steel, designed to last a lifetime.

Comparing Steel

When measured up against other building materials, there's no comparison to steel for combining durability, sustainability and aesthetic quality.

Steel

- Sustainable
- Recyclable
- Long lifespan
- Comprehensive warranty
- High quality finishes and patterns
- Easy install

Wood

- Warps and rots
- High maintenance
- Combustible
- Labor intensive
- Expands and contracts

Vinyl

- Color fades
- Expands and contracts
- Combustible
- Can melt with hot temperatures
- Low impact resistance
- Lower aesthetic value

Aluminum

- Lower impact resistance
- More expensive
- Clip installation may be required

Composite

- More expensive
- Color fades
- Combustible
- Expands and contracts

Fiber Cement

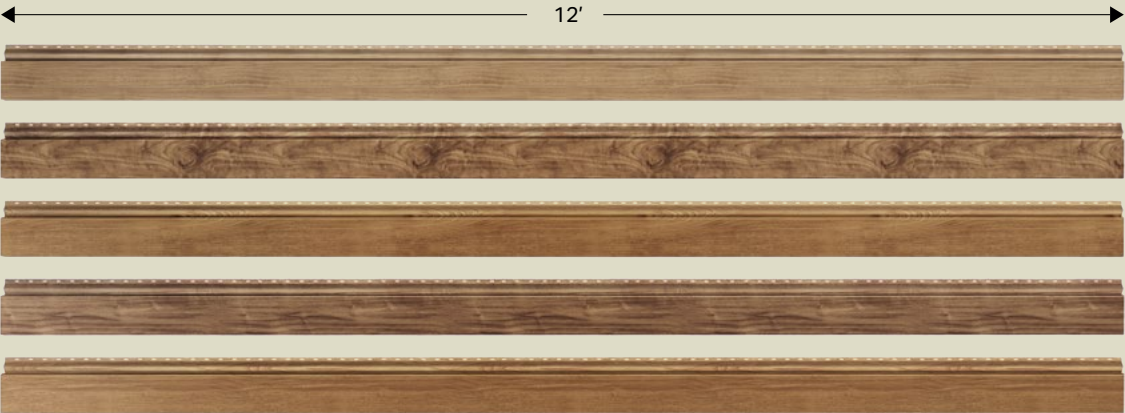

- Labor intensive
- Requires safety equipment
- Requires additional finishing
- Not resistant to moisture
- High maintenance
- Heavy to ship and install

Hyper-Realistic Detail

The process for creating Bellara woodgrain patterns starts at the lumber mill, where we search for rare woods with elegant grains and rustic boards that have a beautifully aged patina. Ultra-high-resolution imaging captures the intricacies of all the grains and knots.

The granular details within each wood grain are digitally composited over 5 unique plank designs per package. Once perfected, these images are etched onto copper plates. They are then painted onto the steel using state-of-the-art coil coating technology combined with the world's best PVDF paints to lock in the wood's natural beauty for generations.

A Complete System

Bellara Plank 90 | Plank 135 | Plank 200

Available in two gauges and multiple widths, Bellara Steel Siding system blends seamlessly to look beautiful for generations. Whether installed vertically or horizontally, the Bellara system produces straight, architectural lines and comes together with a set of color-matched trims to create a seamless facade.

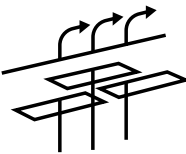

Technical Specs	
Fastening System	Hidden
Gauge(s)	24, 26GA
Panel Coverage	3.64" (92mm)
	5.34" (135mm)
	7.84" (199mm)
Panel Length	12'
Application	Wall
Profile Depth	0.59" (15mm)

Bridging Natural and Built Environments

Bellara supports biophilic designs that provide an emotional and physiological connection to nature. Studies are linking spaces that take advantage of this biophilic design practice to improving health and wellness outcomes because they both engage and relax the mind.

Perforated Soffit

7.0 in²/ft²

To ensure proper ventilation, remove moisture, and avoid condensation, soffits are available with perforations and can be combined with solid planks to achieve proper airflow.

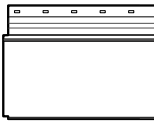

Natural Maple,
Perforated Plank 135

Locked in Beauty

The finish is applied to the roll-formed locking mechanisms so when the side and bottom locks come together, there is no gap in color and wood grain. This snapping lock feature makes installation equally seamless.

Bellara fasteners are hidden as well as engineered to be secured tightly to the building's fascia and won't pop out like nails do over time.

Fitting Seamlessly

An extended edge allows panels to fit seamlessly behind overlapping panels, preventing unsightly gaps from appearing as the building expands and contracts and eliminating the need for transition trims and butt joints.

Industrial

Builders and architects turn to Bellara when designing for all sectors. Its timeless beauty, guaranteed by state-of-the-art coil coating by Sherwin-Williams, and its durability, supported by its availability in both 24GA and 26GA galvanized steel, make Bellara an ideal choice for protecting any real estate property.

Protection you can count on

Bellara’s coating includes Kynar 70% PVDF; Polyvinyl fluoride resin and FEVE. This combination is tough, yet environmentally friendly with no VOCs.

Expressence

Architectural Print Series

Our PVDF and SMP coating systems allow us to recreate the look of natural materials through an ultra high-resolution overprint that is rolled onto the coil, capturing all the nuances of natural wood grain.

G90 Zinc Coating	
Corrosion-Resistant Protective Backer Coat	

Signature Matte

SMP Coated Metal

Our Signature Matte colors incorporate resin that is specifically intended to create a textured surface, scattering light and eliminating the steel's glossy appearance.

Signature

SMP Coated Metal

Signature colors offer durable uniform coverage in a wide variety of hues and shades.

Galvanized Steel Construction

Because Bellara panels are made from galvanized steel, they offer long-term protection from rust. Unlike painted siding, Bellara panels won't flake from UV exposure.

Matching trim system

The Bellara trim system address every conceivable architectural element. So regardless of your vision, Bellara can be tailored to your exact standard and still achieve a flawless finish.

Vicwest is committed to representing the building construction industry through active participation in various associations affiliated with our business. For a complete list of our membership associations, visit vicwest.com.

Look Forward

Bellara Steel Siding will soon offer Board & Batten as well as Lap Siding in a variety of favourite finishes and on-trend colors.

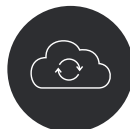

Board & Batten

Lap Siding

While Vicwest has always been passionate about building durable and sustainable products, we're equally passionate about producing them in the most environmentally responsible way. We're building for tomorrow by focusing on four main pillars.

Carbon
Emissions
Reduction

Circularity
Zero Waste to
Landfill

Energy
Building with
Solar

Water
Rainwater
Harvesting
