

# The premier audio solution for builders

## Take your smart home offering to the next level with Sonos.

- **Best-in-class dealer network**

Get premium support from the Sonos network of certified installers, including experts who can help onboard your partners.

- **Model home program**

Enjoy competitive discounts on Sonos products to outfit your model homes and design centers.

- **Smart home consulting**

Reach out to our dedicated team for help customizing solutions for your clients, finding a local installer, and more.

- **Amazing promotional content**

Access tailored presentations, packages, brochures, and digital assets to help grow and sustain your business.

- **Training and education**

Keep your installers, sales associates, and other members of your team up to date with in-person and online training.

- **Seamless integrations**

Leverage the power of Works With Sonos partners to create an exceptional smart home experience for homeowners.

- **Exclusive pricing**

Receive special savings and sample products through our demo program so you can experience Sonos for yourself.

# SONOS

**Renowned for incredible sound, ease of use, and commitment to innovation, Sonos will differentiate your smart home offering and increase buyer satisfaction.**

**Custom sound  
for every home**

Mix and match products for  
multiroom audio, immersive home  
theater, and more.

**Support for  
hundreds of services**

Empower listeners to stream all  
the content they love and control  
it how they want.

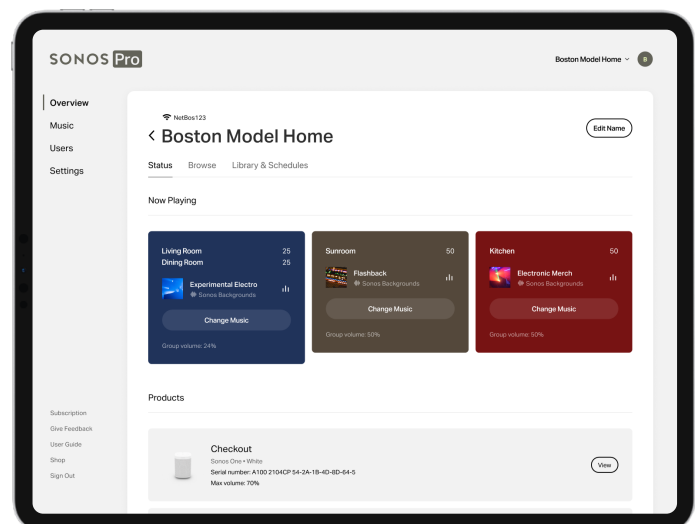

**Premium  
quality**

Fill any space with astonishingly  
clear, rich sound from beautifully  
designed products.

## Set the right mood for your model homes

Sonos Pro gives you the power to provide  
a consistent, legal music experience across  
all model homes, helping your potential  
buyers feel more at home.

- ✓ Remotely control and manage content across all model home or design center locations.
- ✓ Secure legally licensed music playback — with explicit lyrics blocked and content access restricted.
- ✓ Set volume levels and schedules and ensure consistent playback through a single dashboard.
