

Our Mission

For 25 years, Aterra Designs has been creating homes as unique as their owners. Aterra Designs delivers seamless, visually compelling, and highly functional lighting solutions, ensuring a stress-free experience for builders and homeowners alike.

“

“Our electrical designer was a pleasure to work with! She truly understood our needs and provided thoughtful guidance along the way.” – Custom Home Client

Aterra's End-to-End Design Process

01 Concept & Design Development

Our expert design team collaborates closely with builders and homeowners to craft a layered lighting strategy.

02 Lighting Schedules & Photometrics

To ensure consistency and precision, every project includes a detailed lighting schedule with fixture specifications, light levels, etc.

03 Construction Documents

We provide comprehensive construction documents, including a Bill of Materials, to streamline installation and eliminate errors.

04 Frame Walkthrough

Before walls are enclosed, we conduct an on-site frame walkthrough with builders and electricians to ensure optimal functionality.

05 Final Inspection & Adjustments

Once installation is complete, Aterra Designs performs a final quality assurance walkthrough.
