

Virtual Lighting, Electrical, and Home Technology Design

2D and 3D online design tool for option selections and complete documentation

DISCOVER MORE: luminosity.tech / demo@aterradesigns.com

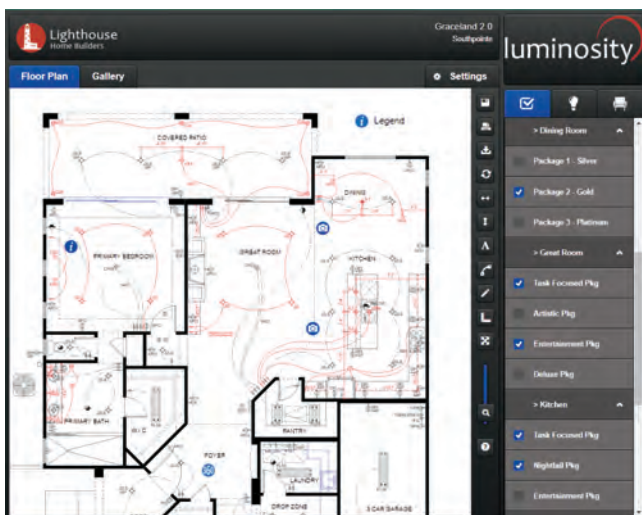

Luminosity provides package-based lighting, electrical, and home technology designs per floor plan. All packages are branded within the builder's website and options selection system.

Interactive floor plans allow home buyers to make selections and view real-time lighting effects in 2D and 3D panorama for each room.

Virtual design tool is fully integrated into the supply-chain. As options are selected, Luminosity generates orders and trade-specific documents to streamline the process from design to installation.

Amaze buyers with real-time lighting effects and your contractors with simple electrical plans.

Lighting selections are accompanied by lot-specific lighting and electrical plan. Home buyers can see their choices in real-time with renderings in 2D and 3D panorama. Our professionally designed packages result in speedy appointments, large lighting sales, and quick installations.
