AprilAire

Helping to Deliver and Maintain Healthy Air

Delivering a Healthy Home

Healthy Air is essential in every home, to promote better health, comfort and peace-of-mind.

A Healthy Air System integrates solutions for ventilation, air purity, humidity, temperature, radon mitigation and the controls that bring it all together.

Homeowners can Breathe Easy in a Healthy Home

Peace-of-Mind

The average person spends up to 90% of their time indoors. Fresh, healthy, outdoor air through controlled ventilation is key to a healthy home!

Ventilation

The Air You Breathe

The air inside your home is up to 5x more polluted than the air outside. Premium air filtration can remove up to 99% of allergens and asthma triggers while protecting the HVAC system.

Air Purity

Feel The Difference

Ideal comfort in the home requires keeping relative humidity in the healthy zone. Proper humidity control is essential whether the air is cold and dry or hot and humid.

Humidity Control

Home Protection

Along with health and comfort, protecting your investment requires year-round control of the air in your home.

Ventilation

Fresh Air Solutions

Homes today are tighter and more energy efficient, so they require fresh air.

Healthy Air Control

AprilAire Ventilation dilutes airborne particles common in most homes.

Ventilate and Save Energy

Save energy by ventilating when the outdoor air is just right.

Reduces Humidity

Push humid air outside by facilitating indoor air movement.

Air Purity

Purifiers & Filters

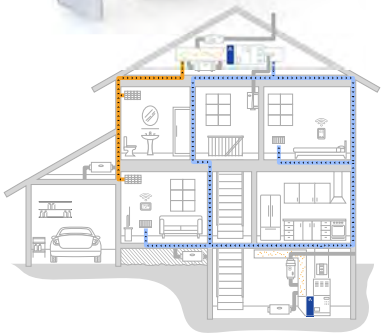

Remove Pollutants

AprilAire air purifiers trap common airborne pollutants like viruses, allergy and asthma triggers, among others.

Protects Your Home

Keep your HVAC system working more efficiently, minimizing repair costs and extending service life.

AprilAire offers several different whole-home purification filters to fit your family's indoor air quality needs. Listed below are the levels of air filter-purification you can install in your home. The "MERV" (Minimum Efficiency Rating Value) helps to identify the proper level.

HEALTHY AIR 11

Vaccum & Dust Less Often.

HEALTHY AIR 13

Removes most Common Allergies.

HEALTHY AIR 13+

Removes Pet & Unwanted Odors.

HEALTHY AIR 16

Captures up to 98% of viruses passing through the MERV 16 Filter.

Humidity Control
Humidifiers

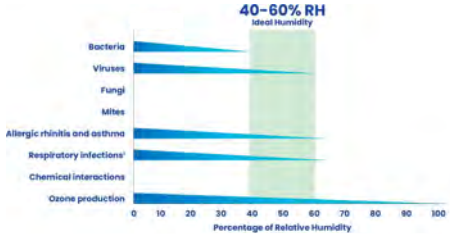

Humidity for Health

Proper Humidity levels help to reduce the airborne incidence of bacteria, viruses, fungi and dust mites, that can cause respiratory infections and symptoms related to allergies and asthma.

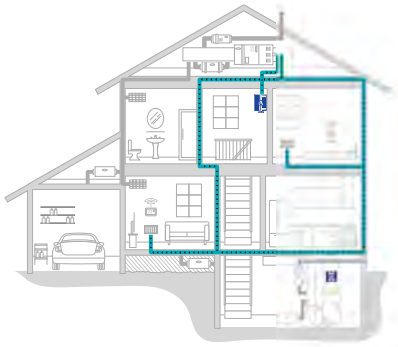

Humidity for Comfort

Whether your home is in a dry region of the country, or in an area with seasonal dryness, maintaining the proper humidity levels can make all the difference in how comfortable you feel in your home.

Humidity for Preservation

Help preserve the natural beauty of wood floors, cabinetry, furnishings and anything else in your home susceptible to warping, cracking, or other permanent damage due to low humidity levels.

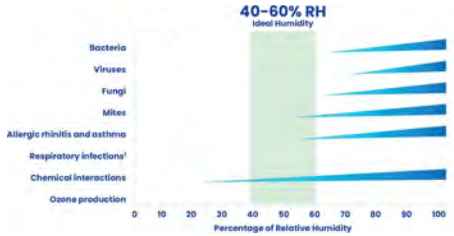

Humidity Control
Dehumidifiers

ASHRAE (American Society of Heating, Refrigeration and Air-Conditioning Engineers) promotes keeping humidity between 40-60% RH (Relative Humidity) to minimize virus survival rates.

Improve Health

Fight viruses, bacteria, mold, and other airborne pollutants that thrive in excessively damp conditions.

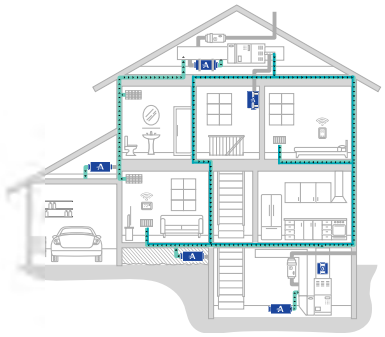

Protect Your Home

Shield your belongings and home furnishings from mildew, rot, and warping.

Save Energy

Balanced humidity prevents your air conditioner or furnace from working overtime, saving you money on future energy costs.

* Insufficient data above 50% RH

E.M. Sterling, Criteria for Human Exposure to Humidity in Occupied Buildings, 1985 ASHRAE

Controls

Thermostats & Zoning

Choose the Right Thermostat & Zone Control for your Home. Everyone Deserves Healthy Air.

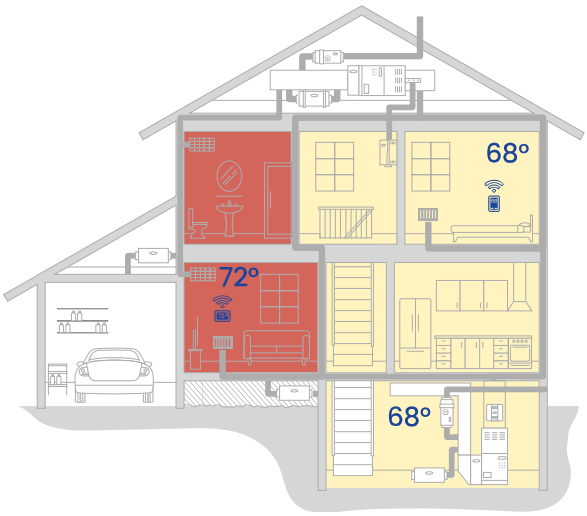

Adjust easily from Android and iOS devices, including Apple Watch.

Energy Savings

Control your home's air with efficiency in mind.

Total Air Control

Adjust your air's purity, humidity, and freshness - not just temperature.

Mobile Access

Your home's indoor air quality (IAQ) is always at your fingertips.
