Cut costs, not corners

According to some builder estimates, SPAN can save you $3-10K per site by enabling all-electric homes on 200 amp utility services

Streamlined compliance that saves costs

Build better homes at lower costs while maintaining margins and complying with make-ready requirements.

Build homes for today—that are ready for tomorrow

Offer homes ready for the future of energy with SPAN PowerUp technology. Enable seamless upgrades, EV charging, and smart energy management.

Smarter homes, faster builds

Build homes faster, sell quicker, and turn profits sooner with SPAN. Save time and money with one-person installs and no need for service upgrades.

Fewer warranty calls, happier homeowners

SPAN Fleet Manager enables builders to remotely identify issues. Fast installation, more efficient warranty calls, and real-time data reduces costs and enhances customer satisfaction.

Expanded SPAN Panel Family

A panel for every project

Save on build costs and reduce complexity while building EV-ready and all-electric homes with SPAN, the smartest electrical panels available.

Smarter homes, faster builds

SPAN products are designed with builders in mind to effortlessly align with your current build schedule and trades, offering a smarter energy solution that fits your process

Enclosure | Panelboard | Panelboard Accessories | Deadfront | Door

Install site flexibility

SPAN is indoor and outdoor rated, and features extensive knockouts with spacious raceways for wiring even the most complex jobs.

Keep your projects moving

The Enclosure and Panelboard can be installed separately, keeping each step lightweight, and allowing projects to move forward according to the pace of your community buildout plan.

Out of the box solar, storage, EV ready

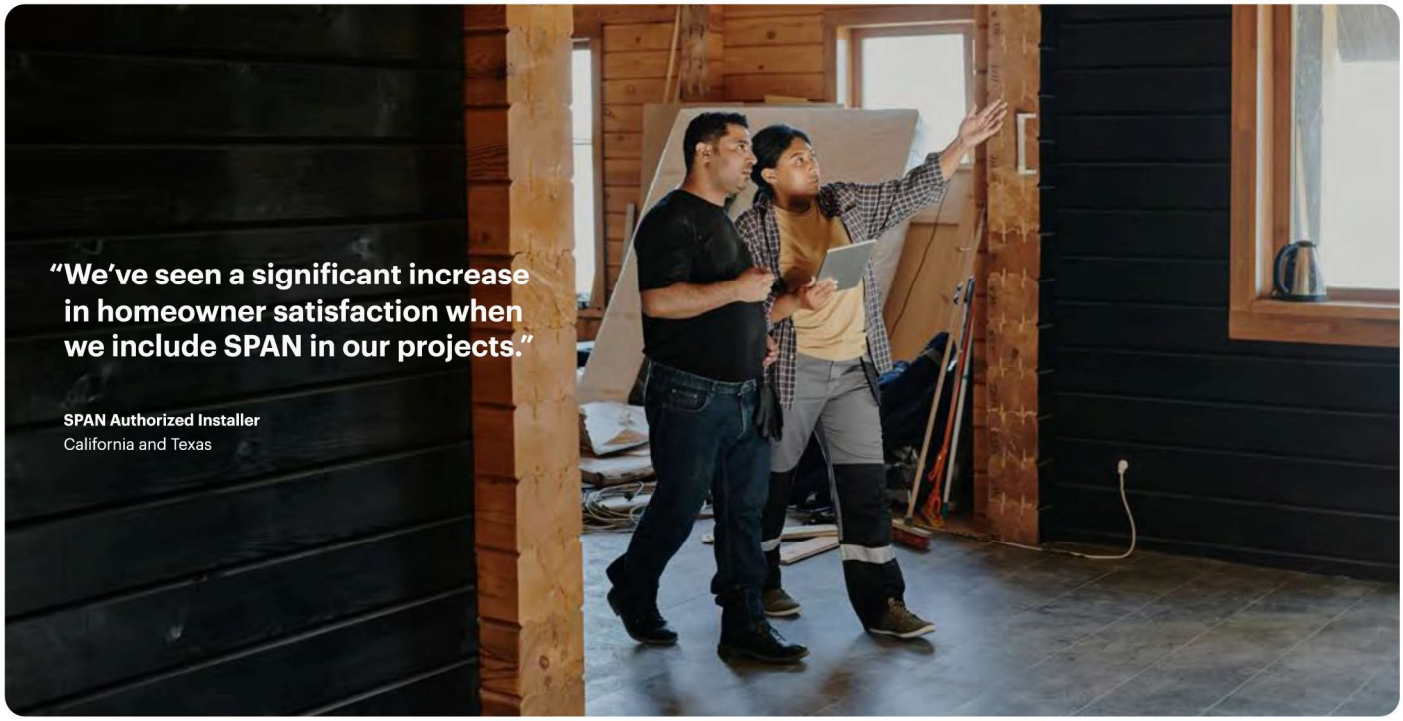

Main breaker includes a built-in microgrid interconnect device (MID) for seamless home battery installs.

No power? No problem.

SPAN Panels can be commissioned on temporary power common for residential new construction jobsites.

Homes that buyers want, today and tomorrow

Deliver differentiated value that attracts modern buyers and strengthens your brand

More out of their battery
SPAN unlocks 100% control over home battery systems, and extends backup duration by 40% in an outage.

Whole-home visibility + control
SPAN centralizes energy data into one real-time dashboard, giving homeowners a 360° view of their home's energy performance.

Flexible future upgrades
SPAN's energy management system (EMS) technology provides a powerful electrical foundation for seamless home upgrades in the future.

Energy saving insights
Give your customers real-time cost saving insights that can help them demystify their energy bills and uncover more ways to save.
