AprilAire

HomeSphere®

Delivering a Healthy Home

Healthy Air is essential in every home to protect the investment, improve efficiency, and promote better overall health and wellness for its occupants.

A **Healthy Air System** integrates solutions for ventilation, air purity, humidity, temperature, and the controls that bring it all together.

Ventilation

The average person spends up to 90% of their time indoors. Fresh, healthy, outdoor air through controlled ventilation is key to a Healthy Home.

Air Purity

The air inside your home is up to 5x more polluted than the air outside. Premium air filtration can remove up to 99%* of allergens and asthma triggers while protecting the HVAC system.

Humidity Control

Balanced humidity requires keeping Relative Humidity (RH) in the healthy zone (40–60%[1]). Proper humidity control is essential whether the air is cold and dry or hot and humid.

Healthy Air Controls

Along with health, protecting the investment requires ultimate sensing and control for optimal indoor air quality in your home.

Ventilation
Fresh Air Solutions

- Meet and exceed most ventilation codes with AprilAire
- Bring in clean air, diluting indoor pollutants, odors, and VOCs
- Help control humidity, reducing mold growth and moisture
- Support a healthier home by preventing stale, stuffy air
- ENERGY STAR®-certified products

Humidity Control
Humidifiers

- Balanced humidity helps protect from airborne bacteria, viruses, and dust mites
- Prevent cracking in hardwood floors, furniture, and cabinetry
- Protect from dry air issues like static shock and dry skin

Controls
Thermostats and Zoning

- Control your home's air with efficiency in mind
- Adjust your air's purity, humidity, and freshness—not just temperature
- Your home's indoor air quality (IAQ) is always at your fingertips
- ENERGY STAR®-certified products

Air Purity
Air Cleaners

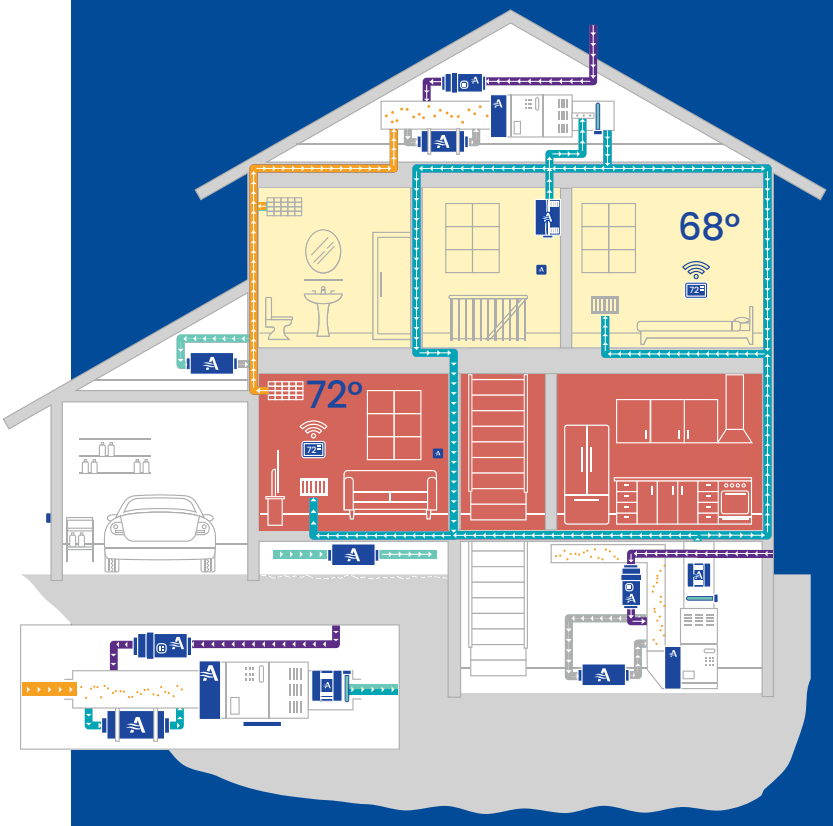

MERV 11 RATING | MERV 13 RATING | MERV 13+ RATING | MERV 16 RATING

- Remove up to 99%* of airborne pollutants
- A broad range of MERV options to meet the homeowner's needs and low static pressure
- Extend HVAC system life with a guarantee to keep coils clean

*Contaminants removed based on air passing through the filtering system with an AprilAire MERV 16 Air Filter

Humidity Control
Dehumidifiers

- Balanced humidity helps protect from airborne bacteria, viruses, and dust mites
- Preserve items in the home susceptible to warping, rotting, or pest damage
- Make warmer temperatures feel more comfortable, saving energy with less AC runtime

[1]While balanced humidity exists between 40 and 60%, it's important to remember that outdoor temperature and other home factors will impact what relative humidity level is attainable and recommended for the house.
